

Pacific Transformer Parts Catalog

For Over
40
Years

Established in 1981, Pacific Transformer Corporation has consistently been at the forefront of magnetic device manufacturing. This catalog is presented as an added convenience for our valued customers. Anticipate further expansions to our product offerings, enhancing the catalog's utility as an resource.

At Pacific Transformer, we take pride in being a leading creator of custom magnetics. If you don't see exactly what you're looking for in this catalog, reach out to us without delay. Our commitment is to craft a personalized component that fits your unique needs and to deliver a detailed quote within 24 hours.

Whether your product requires UL listing, or there's a chance you may seek UL listing in the future, consider Pacific Transformer now. Pacific Transformer manufactures its transformers using an Underwriters Laboratories Inc. recognized electrical insulation system. Buying transformers from an Underwriters Recognized manufacturer provides you with three big advantages.

- 1 Time and expense are reduced during the UL listing procedure. The Pacific Transformer does not have to be individually evaluated.
- 2 Because Pacific Transformers are recognized under the Component Program of UL Inc., no special listing of your transformer will be required. This will relieve you of any follow-up costs (site inspections).
- 3 If your product is presently UL listed, you can substitute a Pacific transformer with just minimal UL revaluation. You will not need a complete resubmittal.

Most importantly, these advantages can be obtained at no additional cost to you. With agency compliance becoming more important, it's more important that you buy your transformers from a qualified and competent source. Pacific Transformer — your source.

TABLE OF CONTENTS

- **2:1 INDUCTANCE SWING INDUCTORS**
Semi-Encapsulated Power Inductors
Power Inductors (Economy Inductors)
- **LOW PROFILE POWER TRANSFORMER**
PTT-01 SERIES
- **LOW PROFILE ENCAPSULATED POWER TRANSFORMER**
PTT-02 SERIES
- **INTERNATIONAL POWER TRANSFORMER**
PTT-03 Style A
PTT-03 Style B
- **CLASS 2 POWER TRANSFORMER**
PTT-04 SERIES
- **HIGH POWER ISOLATION TRANSFORMER**
PTT-05 SERIES
PTT-06 SERIES
- **SPLIT BOBBIN WITH HIGH ISOLATION**
PTT-08 SERIES
PTT-09 SERIES
- **CONVENTIONAL RECTIFIER POWER TRANSFORMER**
PTT-10 SERIES
PTT-11 SERIES
- **INTERNATIONAL STANDARD AT LOWER COST AND BETTER PERFORMANCE**
PTT-12 SERIES
- **INTERNATIONAL STANDARD AT LOWER COST AND BETTER PERFORMANCE**
PTT-13 SERIES
- **INHERENTLY OR NON-INHRENTLY LIMITED**
PTT-14 SERIES
- **MINIATURE LOW POWER TRANSFORMER**
PTT-15 SERIES
PTT-16 SERIES
- **PRINTED CIRCUIT MOUNT-SPLIT BOBBIN WITH HIGH ISOLATION**
PTT-17 SERIES

FEATURES & CHARACTERISTICS

- Other inductance values and/or current ratings are available as options.
- 2:1 Inductance Swing:** The ratio of inductance with no current to the inductance with rated current is nominally 2:1.
- Energy Rating:** Computed as $LI^2/2$.
- Operating Temperature:** -55° C to +130° C (wire insulation, Class B).
- Standard Inductance Tolerance:** $\pm 10\%$, tighter tolerance available.
- Temperature Rise:** 40° C. Nominal.

LOW PROFILE TRANSFORMER

PTT-01 SERIES

LOW PROFILE TRANSFORMERS

Our low profile transformers use hum-bucking (semi toroidal) construction that minimizes radiated magnetic fields. These transformers are ideal for critical low height pc board applications.

General Specifications

- **Power**— 2VA to 48VA.
- **Dielectric Strength**— 3000VRMS Hipot.
- **Primaries**— Dual primaries (115/230V, 50-60 Hz).
- **Secondaries**— Series or parallel secondaries.
- **Electrostatic Shield**— Not necessary, split bobbin construction.
- **Magnetic Field**— Reduced magnetic radiation.
- **Height**— 0.65 to 1.40 inches high.
- **Insulation**— Class B insulation (130°C).

Agency Standards

- UL, compliant to UL 506.
- CSA, compliant to CSA 22.2 #66.

LOW PROFILE TRANSFORMER

PTT-02 SERIES

LOW PROFILE TRANSFORMERS

Printed Circuit Board Mount

Our low profile transformers utilize unique insulating techniques, including full encapsulation to meet international safety requirements. These transformers are ideal for low power applications where minimum height is required.

General Specifications

- **Power**— 2VA to 6VA.
- **Dielectric Strength**— 4000VRMS Hipot.
- **Primaries**— Dual primaries (115/230V $\pm$ 15%, 50-60 Hz).
- **Secondaries**— Series or parallel secondaries.
- **Electrostatic Shield**— Not necessary, split bobbin construction.
- **Magnetic Field**— Reduced magnetic radiation.
- **Height**— 0.70 to 0.90 inches high.
- **Insulation**— Class B insulation (130°C).
- **Agency Standards**
 - UL, compliant to UL 506.
 - CSA, compliant to C22.2 #66.
 - VDE, compliant to VDE 0805.
 - VDE, compliant to IEC 950.

INTERNATIONAL POWER TRANSFORMERS

Chassis Mount

PTT-03 SERIES

Our International transformers provide the high isolation, creepage and clearance necessary to comply with International safety standards.

General Specifications

- ♦ **Power**— 25VA to 175VA
- ♦ **Dielectric Strength**— 4000VRMS Hipot
- ♦ **Primaries**— Dual primaries (115/230V- 50/60)
- ♦ **Secondaries**— Series or parallel secondaries
- ♦ **Electrostatic Shield**— Not necessary, dual bobbin construction
- ♦ **Terminals**— Solder lug/quick-connect type terminals
- ♦ **Leakage**— Leakage current to meet UL 544
- ♦ **Insulation**— Class F insulation (155°C)
- ♦ **Flammability Rating**— Bobbin and shroud material meet UL 94VO

Agency Standards

- ♦ UL recognized to UL 506
- ♦ CSA compliant to C22.2 #66
- ♦ VDE compliant to VDE/EN 60950
- ♦ VDE compliant to IEC 950

CLASS 2 TRANSFORMERS

PTT-04 SERIES

CLASS 2 TRANSFORMERS

Inherently or Non-inherently Limited Printed Circuit Mount

Our Class 2 transformers are available in printed circuit and chassis mount versions. They are supplied as inherently or non-inherently limited units that are UL 1585 compliant.

General Specifications

- ◆ **Power**— 25VA to 50VA
- ◆ **Dielectric Strength**— 4000VRMS Hipot
- ◆ **Primaries**— Dual primaries (115/230V- 50/60 Hz)
- ◆ **Secondaries**— Single secondary
- ◆ **Electrostatic Shield**— Not necessary, split or dual bobbin construction
- ◆ **Class 2 Rating**— Inherently or non-inherently limited. See secondary fuse requirements in tables below.
- ◆ **Leakage**— Leakage current to meet UL 544
- ◆ **Insulation**— Class F insulation (155°C)
- ◆ **Flammability Rating**— Bobbin and shroud material meet UL 94VO.

Agency Standards

- ◆ UL recognized to UL 1585 Class 2.

POWER ISOLATION TRANSFORMERS

PTT-05 , 06 SERIES

PACIFIC TRANSFORMER CORP., 5399 E. HUNTER AVE., ANAHEIM, CA. 92807
(714) 779-0450 • (800) 325-0501 • FAX (714) 779-0718 • www.pactran.com

POWER ISOLATION TRANSFORMERS

Industrial Grade Step-up Transformers

Our power isolation transformers have been designed to provide a multitude of step-up voltages to accommodate the various input voltages available throughout the world. Also designed and constructed to meet UL and CSA safety standards.

General Specifications

- ◆ **Power**—250 VA to 9 KVA (500 VA to 18 KVA possible if used as auto-transformer)
- ◆ **Dielectric Strength**—2500VRMS Hipot
- ◆ **Primaries**—Dual/tapped primaries: Parallel connected (104V, 110V, 120V-50-500 Hz). Series connected (208V, 220V, 230V, 240V-50-500 Hz).
- ◆ **Secondaries**—Dual/tapped secondaries: Parallel connected (208V, 220V, 240V-50-500 Hz). Series connected (416V, 440V, 460V, 480V-50-500 Hz).
- ◆ **Electrostatic Shield**—5 mil thick copper foil connected to ground. The connection may be opened if an ungrounded shield is desired.
- ◆ **Terminals**—Plated brass screw type terminals
- ◆ **Insulation**—Class H insulation (180 C.)

As shown on the schematic diagram the transformer is designed with dual primaries and secondaries. Two primary windings are identically rated at 0/104/110/120.. Two secondary windings are identically rated at 0/208/220/240. This permits series or parallel connections on either primary or secondary. Therefore a nominal 110 to 220 volt, 220 to 440 volt, 110 to 440 volt or 440 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as 416, 428 and 460 volts. It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings a 660 to 330 volts or 330 to 660 volts can be set up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is doubled.

SPLIT BOBBIN WITH HIGH ISOLATION

PTT-08 , 09 SERIES

PACIFIC TRANSFORMER CORP., 5399 E. HUNTER AVE., ANAHEIM, CA. 92807
(714) 779-0450 • (800) 325-0501 • FAX (714) 779-0718 • www.pactran.com

Chassis Mount, Quick Connect Terminal, Split Bobbin Design

Pacific's PTT-08 Series with split bobbin and non-concentric winding provide better insulation and high signal isolation.

General Specifications

- ◆ **Power**— 2.4VA to 100VA
- ◆ **Dielectric Strength**— 2500VRMS Hipot
- ◆ **Primaries**— Single primary (115V- 50/60Hz)
- ◆ **Secondaries**— Center tapped secondaries
- ◆ **Terminals**— Solder lug/quick-connect type terminals
- ◆ **Insulation**— Class B insulation (130°C)

Agency Standards

- ◆ UL compliant to UL 506
- ◆ CSA compliant to C22.2 #66

CONVENTIONAL RECTIFIER POWER TRANSFORMER

PTT-10 , 11 SERIES

PACIFIC TRANSFORMER CORP., 5399 E. HUNTER AVE., ANAHEIM, CA. 92807
(714) 779-0450 • (800) 325-0501 • FAX (714) 779-0718 • www.pactran.com

Conventional Rectifier Power Transformer (Single Primary)

Our PTT-10 series transformer provide a wide variety of outputs .

Product Features & Specifications

- ◆ **Power**— 10VA to 2800VA
- ◆ **Primaries**— Single Primary 115V, 50-500Hz
(optional taps :105V, 125V)
- ◆ **Secondaries**— Center-tapped series or center-tapped parallel secondaries
- ◆ **Insulation**— Class B insulation (135°C)
- ◆ **Dielectric Strength**— 2500VRMS Hipot

Agency Standards

- ◆ UL recognized to UL 506
- ◆ CSA compliant to C22.2 #66

Conventional Rectifier Power Transformer (Dual Primary)

Our PTT-11 series transformer provide a wide variety of outputs .

Product Features & Specifications

- ◆ **Power**— 10VA to 2800VA
- ◆ **Primaries**— Single, Tapped or Dual Primaries (105,115V,125V,230V, 50-500Hz)
- ◆ **Secondaries**— Center-tapped series or center-tapped parallel secondaries
- ◆ **Insulation**— Class B insulation (135°C)
- ◆ **Dielectric Strength**— 2500VRMS Hipot

Agency Standards

- ◆ UL recognized to UL 506
- ◆ CSA compliant to C22.2 #66

SPLIT BOBBIN WITH HIGH ISOLATION

PTT-12 SERIES

PACIFIC TRANSFORMER CORP., 5399 E. HUNTER AVE., ANAHEIM, CA. 92807
(714) 779-0450 • (800) 325-0501 • FAX (714) 779-0718 • www.pactran.com

International Transformers, Printed Circuit Mount

Pacific's PTT-12 Series comes in variety of sizes. The split Bobbin and non-concentric winding provide better isolation, creepage and clearance necessary to comply with International Safety Standards.

Product Features & Specifications

- ◆ **Power**— 20VA to 56VA
- ◆ **Primaries**— Dual primaries (115/230V- 50/60)
- ◆ **Secondaries**— Series or parallel secondaries
- ◆ **Insulation**— Class F insulation (155°C)
- ◆ **Dielectric Strength**— 4000VRMS Hipot

Agency Standards

- ◆ UL compliant to UL 506
- ◆ CSA compliant to C22.2 #66
- ◆ VDE compliant to VDE/EN 60950
- ◆ VDE compliant to IEC 950

Inherently or Non-inherently Limited (CLASS 2)

Pacific's PTT-14 Series are supplied as inherently or non-inherently limited units that are designed to meet UL 1585.

Product Features & Specifications

- ◆ **Power**— 25VA to 80VA
- ◆ **Primaries**— Dual primaries (115/230V- 50/60 Hz)
- ◆ **Secondary**— Single secondary
- ◆ **Class 2 Rating**— Inherently or non-inherently limited
- ◆ **Terminals**— Solder lug/quick-connect type terminals
- ◆ **Insulation**— Class F insulation (155°C)
- ◆ **Dielectric Strength**— 4000VRMS Hipot
- ◆ **Flammability Rating**— Bobbin and shroud material meet UL 94VO

Agency Standards

- ◆ Designed to meet UL 1585 Class 2

Miniature Low Power Printed Circuit Transformers

Pacific's PTT-15 series provides the high isolation and because of concentric winding can be operated up to 400 Hz without any degradation in output voltage.

Product Features & Specifications

- ◆ **Power**— 1VA to 24VA
- ◆ **Primaries**— Single primary (115V- 50-500Hz)
- ◆ **Secondaries**— Series or parallel secondaries
- ◆ **Insulation**— Class B insulation (130°C)
- ◆ **Dielectric Strength**— 1500VRMS Hipot

Agency Standards

- ◆ UL compliant to UL 506
- ◆ CSA compliant to C22.2 #66

Miniature Low Power Printed Circuit Transformers

Pacific's PTT-16 series provides the high isolation and because of concentric winding can be operated up to 400 Hz without any degradation in output voltage.

Product Features & Specifications

- ◆ **Power**— 1VA to 24VA
- ◆ **Primaries**— Dual primaries (115/230V- 50-500Hz)
- ◆ **Secondaries**— Series or parallel secondaries
- ◆ **Insulation**— Class B insulation (130°C)
- ◆ **Dielectric Strength**— 1500VRMS Hipot

Agency Standards

- ◆ UL compliant to UL 506
- ◆ CSA compliant to C22.2 #66

PRINTED CIRCUIT MOUNT-SPLIT BOBBIN WITH HIGH ISOLATION

PTT-17 , 18 SERIES

PACIFIC TRANSFORMER CORP., 5399 E. HUNTER AVE., ANAHEIM, CA. 92807
(714) 779-0450 • (800) 325-0501 • FAX (714) 779-0718 • www.pactran.com

Printed Circuit Mount - Split Bobbin With High Isolation

Pacific's PTT-17 Series are available in a variety of sizes. Passes 2500VRMS Hipot. Also heavier transformers are provided with mounting holes for additional mounting security.

Product Features & Specifications

- ♦ **Power**— 1.1VA to 36VA
- ♦ **Primaries**— Single primary (115V - 50/60 Hz)
- ♦ **Secondaries**— Series or parallel secondaries
- ♦ **Insulation**— Class B insulation (130°C)
- ♦ **Dielectric Strength**— 2500VRMS Hipot

Agency Standards

- ♦ ETL Listed, Compliant to UL 506 and CSA C22.2 #66 File# 3072455.

STEP DOWN AUTO TRANSFORMERS

PTT-19 SERIES

PACIFIC TRANSFORMER CORP., 5399 E. HUNTER AVE., ANAHEIM, CA. 92807
(714) 779-0450 • (800) 325-0501 • FAX (714) 779-0718 • www.pactran.com

Step Down Auto Transformer (Chassis Mount)

Pacific's PTT-19 Series Auto-Transformers provide stepping down capability to achieve the worldwide applications.

Product Features & Specifications

- **Power**— 100VA to 2000VA
- **Voltage**— 230V to 115V or 115V to 230V - 50/60
- **Insulation**— Class B insulation (130°C)

Agency Standards

- UL compliant to UL 506
- CSA compliant to C22.2 #66

CURRENT SENSOR TRANSFORMERS

FEATURES:

- Maximum ratings specified with rated secondary terminating resistance and one turn primary.
- Amp-micro second ($A\mu\text{Sec.}$) rating of primary equals volt-microsecond ($V\mu\text{Sec.}$) rating of secondary when secondary is terminated in rated resistance. (Amp-microseconds is equal to the product of a square pulse of current in amps times the current pulse width in micro seconds).
- Maximum operating temperature: 105 degree C.
- When terminated with rated terminating resistance the inductor scale factor is $V_{\text{out}} = 1 \text{ volt per amp}$ for center tapped units terminating resistance for each half of winding is listed value divided by 2.
- Secondary is fully isolated to $> 2500 \text{ V.}$
- Useful operation to $> 100 \text{ KHZ.}$
- Not suitable for measurement of DC current. Current waveform must be free of any DC component.

PTC-01-100

Part Number	Secondary Turns	Secondary Inductance MHY (min.)	Secondary DCR OHMS (max.)
